

ParallelRoof 100 Veranda System

ParallelRoof 100 is a non-insulated roof veranda system, which is ideal for creating covered outdoor spaces such as winter gardens, verandas, terraces and carports.

It is an integrated system, which includes provision for roof drainage, and has been designed to exceed structural requirements for wind and snow loading, without the need for additional steel reinforcement.

Stylish yet very robust

- Aesthetically-designed aluminium veranda system that will keep its looks for many years
- No plastic thermal bridges with a complex configuration
- Lightweight, slim profiles which maintain excellent rigidity
- Fully waterproofed roofing system
- Excellent load-bearing capacity to withstand exposure to rain and snowfall, in addition to a variety of glazing options

Integrated system

- Integrated wall plate for direct fixing to main building
- Aluminium guttering system with deeper options available
- Rafters incorporate glazing beads (not the usual screw down or hammer down type) for a neat appearance

Available in a choice of rafter heights

1. Choice of glazing
2. Eaves Beam
3. Integral gutter
4. Rafter

Quick and easy installation

- The system has been designed to be assembled on site with minimal fuss

Highly versatile system

- Variable angles from 5° to 40°
- Accepts glass from 6.8mm
- Polycarbonate glazing up to 34mm thick where required

Variety of uses

Ideal for roofing on many types of external structures including:

- Glazed verandas
- Carports
- Outdoor seating areas
