

The Heritage Collection

The Heritage Collection of aluminium windows and doors from Reynaers Aluminium is designed to meet the unique requirements of renovation and refurbishment projects, particularly where planning guidelines or traditional building aesthetics dictate a more sympathetic approach in classic, heritage style properties.

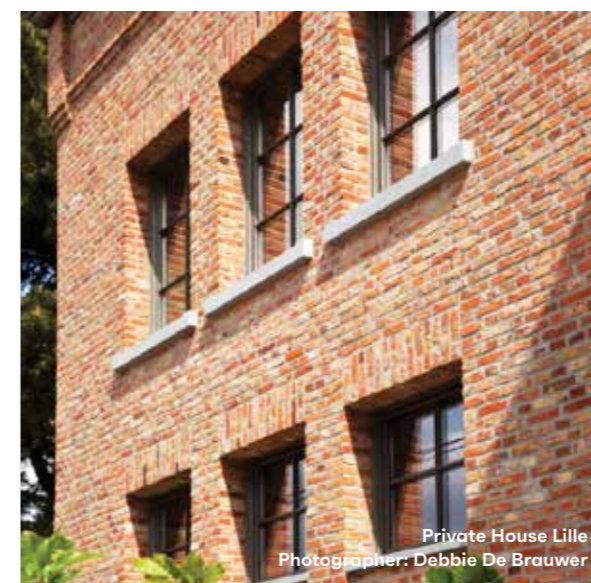

Where timeless, classic design meets modern innovation

Reynaers custom-made aluminium window and door systems provide the perfect solution for the replacement of traditional-style window variants, which includes metal framed type windows often found in listed buildings or in properties located within conservation areas.

So, whether you're trying to match the style of your existing property or wishing to complement it, the Heritage Collection from Reynaers cleverly blends elegant design, with the latest thermally efficient technology, to create a beautifully crafted, high-performance glazing solution for your home.

Designed to perfectly complement the period look of a traditional property, the SlimLine 38 and SlimLine 68 aluminium window and doors offer clean sightlines that mimic the features of original period styles, whilst also providing the highest levels of thermal and acoustic performance.

For a more contemporary edge, the MasterLine 8 and ConceptSystem 77 boast sleek, yet durable profiles, adding a modern touch to any traditional space, as well as enhanced levels of security, weather resistance and thermal insulation.

Be reassured with Reynaers

Engineered without compromise, our range of aluminium windows and door systems have been specified time and again by the world's leading architects and construction companies, for some of the most iconic building projects.

Reynaers at Home brings together the uncompromising quality and performance for which Reynaers is globally renowned, with the hands-on expertise of specialist retail installer partners who are local to you.

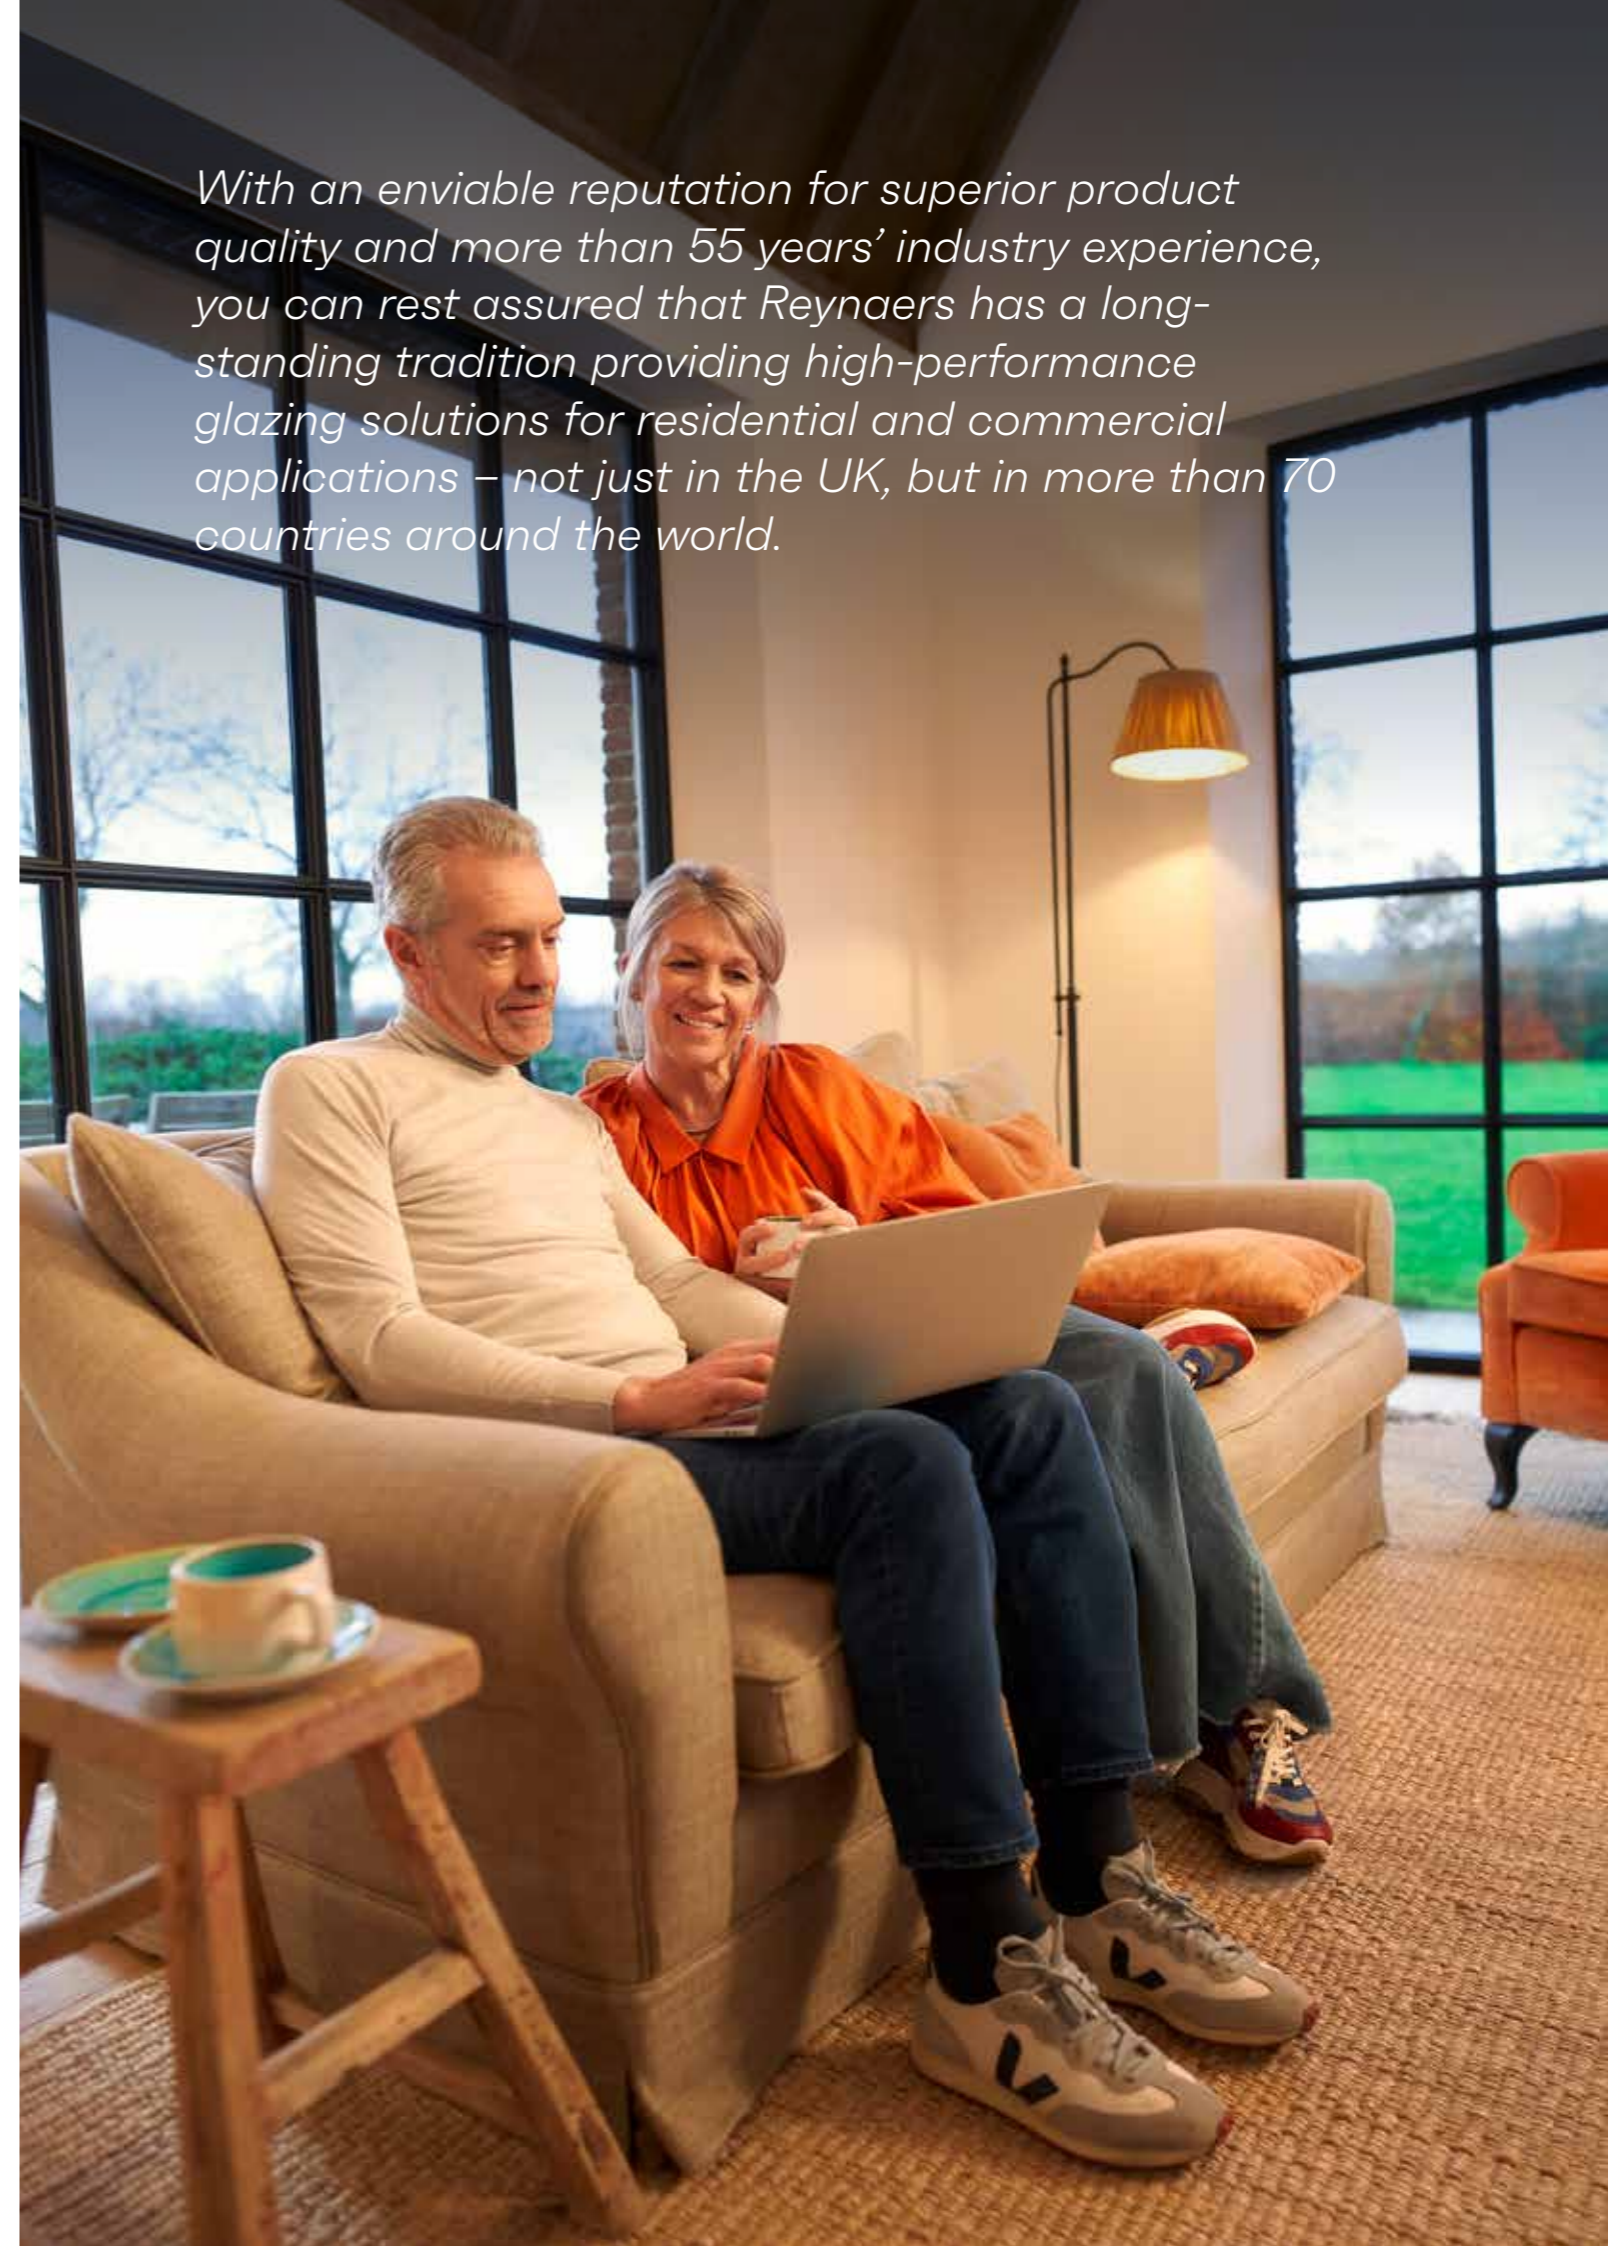

Our network of carefully selected partners will guide you through your home transformation process, from the initial design and specification stages through to the supply and installation of your bespoke aluminium window and door systems.

Contact your nearest Reynaers at Home partner today to start transforming your home.

With an enviable reputation for superior product quality and more than 55 years' industry experience, you can rest assured that Reynaers has a long-standing tradition providing high-performance glazing solutions for residential and commercial applications – not just in the UK, but in more than 70 countries around the world.

SlimLine 68

Panoramic view and comfort

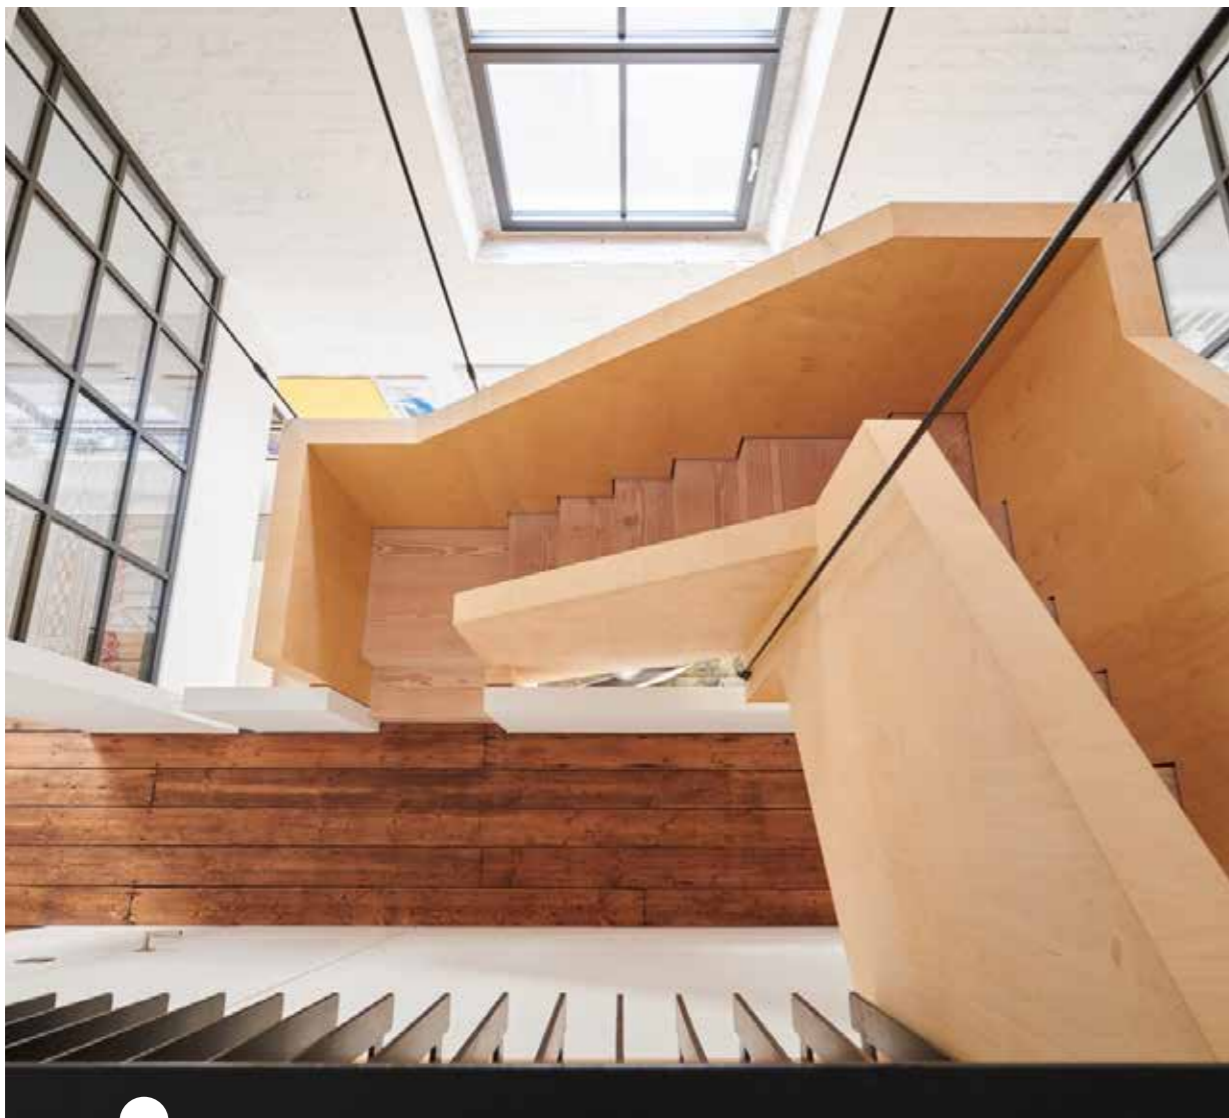

The SlimLine 68 range of windows offers homeowners a well-balanced solution perfectly suited for renovation projects, whilst retaining the original heritage features, whilst increasing weather resistance and insulation.

With sleek, clean lines, these beautifully designed windows can transform the appearance of any home, adding value to the property whilst also making it warmer, brighter and more secure.

Perfectly complementing both contemporary and traditional styles of property, the SlimLine 68 window is both stylish and timeless by design.

Product highlights:

- Industry-leading thermal insulation
- Ultra-slim sightlines
- High levels of comfort with excellent acoustic and weather sealing performance
- Wide range of colour options and variants to suit a range of needs
- Double- and triple-glazed options
- Easy-clean egress hinge option
- Strong and durable, with low maintenance
- Enhanced safety features, with 'Secured by Design' and 'PAS24' certification
- Window Energy Rating up to A++
- U-value as low as 1.2W/m²K

SlimLine 38

Light, elegance and comfort

SlimLine 38 is a highly insulated aluminium window and door system that combines ultimate comfort with minimalistic, classic design.

The SlimLine 38 windows and doors have been designed to perfectly replicate the 'steel look' or metal framed style commonly found in many traditional homes.

Available with optional triple glazing, the SlimLine 38 is the perfect match for heritage buildings and renovation projects, where respecting the original design is of utmost importance.

Product highlights:

- Designed to perfectly replicate 'steel look' or metal framed style window and doors with a wide variety of different styles available
- High levels of comfort, with excellent acoustic and weather sealing performance ratings
- Wide range of colour options and variants to suit a range of needs
- Industry-leading maximum sizes offering improved flexibility in design
- Double- and triple-glazed options
- Enhanced safety features, with 'Secured by Design' and 'PAS24' certification
- Strong and durable, with low on-going maintenance requirements
- Easy-clean egress hinge option
- Window Energy Rating up to a B
- U-value as low as 1.12W/m²K

Architect: Johan Van den Nijden

ConceptSystem 77

Optimised safety and comfort

The ConceptSystem 77 incorporates a comprehensive range of inward and outward-opening window and door designs that are available in three alternative styles, making it an ideal choice for both traditional heritage properties and contemporary buildings.

Available with a huge variety of colours and finishes, and the option to specify a different colour inside and out, the ConceptSystem 77 is a truly versatile system that can complement almost any architectural style.

The ConceptSystem 77 not only looks stylish but it is also a great all-round performer in terms of thermal insulation, weather resistance and security.

Product highlights:

- A great, all-round performer for thermal, acoustic and weather-sealing performance
- Three design variants, offers a range of solutions to suit traditional or more contemporary style properties
- Extensive range of colour options and finishes
- Double and triple-glazed options
- Strong and durable, with low maintenance requirements
- Safe and secure with 'Secured by Design' accreditation and 'PAS24' certification
- Window Energy Rating up to a B
- U-value as low as 1.2W/m²K

MasterLine 8

Crafted for masters

MasterLine 8 is a high-specification, next generation window and door system that delivers 'best-in-class' performance. It is available in three insulation levels and can match a wide range of architectural styles, to complement the period look of any heritage or traditional style property.

The MasterLine 8 system is available in a wide range of designs, perfect for any style of building, with the narrow frame / large pane combination bringing the outside in.

Plus, with impressive performance ratings for acoustics, thermal insulation, and air- and water-tightness, it's easy to see why MasterLine 8 is the popular choice for many refurbishment and renovation projects.

Product highlights:

- Exceptional thermal, acoustic and weather sealing performance
- Four design variants, each with its own distinct look and feel offers improved versatility
- A choice of three levels of insulation
- Wide range of colour options
- Double and triple-glazed options
- Available with a hidden vent system for a more minimalistic appearance
- Strong and durable, with low maintenance requirements
- Safe and secure with 'Secured by Design' accreditation and 'PAS24' certification
- Window Energy Rating up to A++
- U-value as low as 1.15W/m²K

Why does aluminium deliver improved performance?

Compared to other conventional types of window and door systems, aluminium window and doors offer homeowners a number of significant advantages.

Aluminium windows and doors are not only more environmentally friendly, being 100% recyclable, they're also much kinder to your pocket. Being thermally efficient, means homeowners will pay less to heat their home in the coldest months of the year - especially important, as energy bills continue to rise.

Broad design and functional possibilities

Available in extreme safety variants including bulletproof

Well balanced price-quality-feature mix

You can be reassured that Reynaers Aluminium is making sustainability second nature

The benefits

- Industry leading thermal insulation will help reduce home energy consumption, and lower your heating bills
- The sleek, slimline profiles of aluminium maximise the amount of glass in a window or door, thereby letting even more light into your home
- Aluminium windows and doors are available in a wide selection of contemporary or classic colour choices and finishes, to match a range of architectural styles
- Strong and secure – aluminium's strength ensures it will last the test of time, and this also means it helps improve home security, with many Reynaers systems having the added protection of 'Secured by Design' accreditation or 'PAS 24' certification
- Durable, long-lasting luxury - aluminium doesn't warp, corrode or rot, and it's not affected by UV-rays or moisture so it will preserve its premium look and feel after many years, even in harshest of environments
- Aluminium is 100% recyclable, so you can be further reassured of its sustainability credentials
